Presentation leaflet

# FILE SHARING

---

Exchange data easily with no limit on size

## Temporary sharing

- ✓ In just a few clicks, send a download link to your correspondent so that they can retrieve the documents desired, without any size limit. Choose a password and expiration date to ensure your transfer is as secure as possible.
- ✓ Send an upload link to your correspondent and find the received files directly in your NetExplorer workspace.

## Collaborative sharing

- ✓ Invite participants inside or outside your company to collaborate with you on the files of your choice.
- ✓ Give them the desired access rights for a limited or indefinite time depending on the progress of the project.

# ONLINE COLLABORATION

Save time and work together with ease

## Folder creation

Create folders, assign access rights and see the latest files in real time.

## Collaborative editing

Edit your document with others, simultaneously, using Office 365. Your file is automatically locked to avoid conflicts and is saved in real time.

## Timeline

Access the history of your document using the timeline and view all the actions performed by other users. You'll know who does what and when!

## Annotation

Add annotations to your folder or file and quickly find your employees' comments thanks to the avatars.

## Email notification

Improve communications through email alerts to automatically notify your partners as soon as a document is added or modified.

# ONLINE STORAGE

Back up confidential data securely

## Mobility

View your company's data 24/7 on your computer, tablet or smartphone. Is your head office in France, but your offices abroad? Your files remain constantly available, even without an internet connection!

## Confidentiality

Grant multiple levels of access to your users and secure your company's data as much as possible. For maximum privacy, each user has their own login and password.

## Optimal tracking

As an administrator, you will have access to comprehensive tracking of all user actions on your collaborative platform. You can see who has done what, when and on what device.

# MAXIMUM DATA SECURITY

Security at the heart of our business

## Security

- ✓ NetExplorer is ISO 27001 (2013 version), ISO 9001 (2015 version) and ISO 14001 (2015 version) certified.
- ✓ Certified datacenters : SSAE16/ISAE3402 SOC-1 Type II / ISO 27001 / PCI-DSS / FACT / ISO 9001 / ISO 50001.
- ✓ Network : 60gbps of internet transit provisioned across our two data centres in the Paris region.
- ✓ Solution 100% compliant with the **GDPR**.

## Backup and availability

- ✓ Real-time data redundancy across two remote sites to ensure continuity of service.
- ✓ Service availability guaranteed at **99.9%** and network availability measured annually at 99.995%.

## Retention

Data stored on three physical media with a **30-day retention period**, allowing users to recover a file up to 30 days after its deletion (depending on the package).
